

Pablo Atchugarry

formas eternas

The charm of Pablo Atchugarry's works at the
MarePineta Resort in Milano Marittima

Milano Marittima, Cervia (RA), April 7th – November 4th 2025

We are delighted to announce for the 2025 Season - the 99th to be precise - the opening of the extraordinary exhibition *Formas Eternas*, by the Uruguayan sculptor Pablo Atchugarry, which will take place in the evocative MarePineta Sculpture Park. The Milano Marittima Resort, now renowned not only for its splendid location, continues to promote art and culture through an established collaboration with the Contini Art Gallery, which began three years ago.

Davide Salaroli, Sole Director of the MarePineta Resort, commented: 'Pablo Atchugarry's exhibition represents a further step in our commitment to promoting art as a fundamental element of our identity. The presence of works by an artist of such calibre not only enriches our cultural offer, but also underlines our desire to make art accessible to all. We firmly believe that art and design are essential to elevating the experience of our guests and the community.'

Atchugarry's monumental sculptures in bronze or steel are all of extraordinary expressive power, some soaring more than two metres into the sky, and will be the protagonists of an exhibition that will take place both in the Resort's garden, immersed in nature, and in the refined interior spaces of the Hotel. Atchugarry's works, already appreciated by the public all over the world, will find here an exceptional setting that combines art, design, and five-star hospitality.

The exhibition will be open not only to MarePineta guests but also to the outside public, allowing everyone to immerse themselves in a unique artistic experience. We invite visitors to enjoy an aperitif, lunch or dinner surrounded by works of art, in the enchanting setting of our garden, to combine the pleasure of visual beauty with that of convivial moments.

Pablo Atchugarry, supported by the Contini Gallery since 2019, has conquered the art world with his creations that unleash the expressive power of matter. His abstract sculptures, which fuse his Renaissance heritage with a contemporary aesthetic, reveal his mastery in the interaction with light, which becomes an integral part of his works.

The exhibition 'Formas Eternas' represents a journey through sculpture, nature and contemporary art, an experience not to be missed by all lovers of art and culture. The official opening with the presence of the artist will take place on 7 June, but the works are already on display and will be on show until the 4th November 2025.
